

# 2017 JAVA Homework 5

## ● Notice

1. Please use JAVA 8 and Eclipse in this homework.
2. Do not copy homework of others. If it happened, you will get ZERO whether you are either the owner of the homework or the copycat.
3. 3You have to deeply understand what your program do because TA will ask you something about your program during the demo.
4. If you have any question, please send email to [java\\_ta@net.nsysu.edu.tw](mailto:java_ta@net.nsysu.edu.tw) or come to EC5018, but TA does not help to debug.
5. If you do not submit your assignment on time, you will not hand in the delayed homework and get ZERO as well. If you have trouble, please advise in advance by email. Moreover, time and place for demo will be announced later.

## ● Upload

1. Please compress your homework into zip or tar archive.
2. Naming rules: "StudentID\_HW5.zip".  
For example: M043040001\_HW5.zip
3. Upload your homework to National Sun Yat-sen Cyber University.
4. Deadline: 2017/04/17 (Mon.) 23:59.

## ● Hint

Any element (+, -, #, \_, etc.) in UML are meaningful.

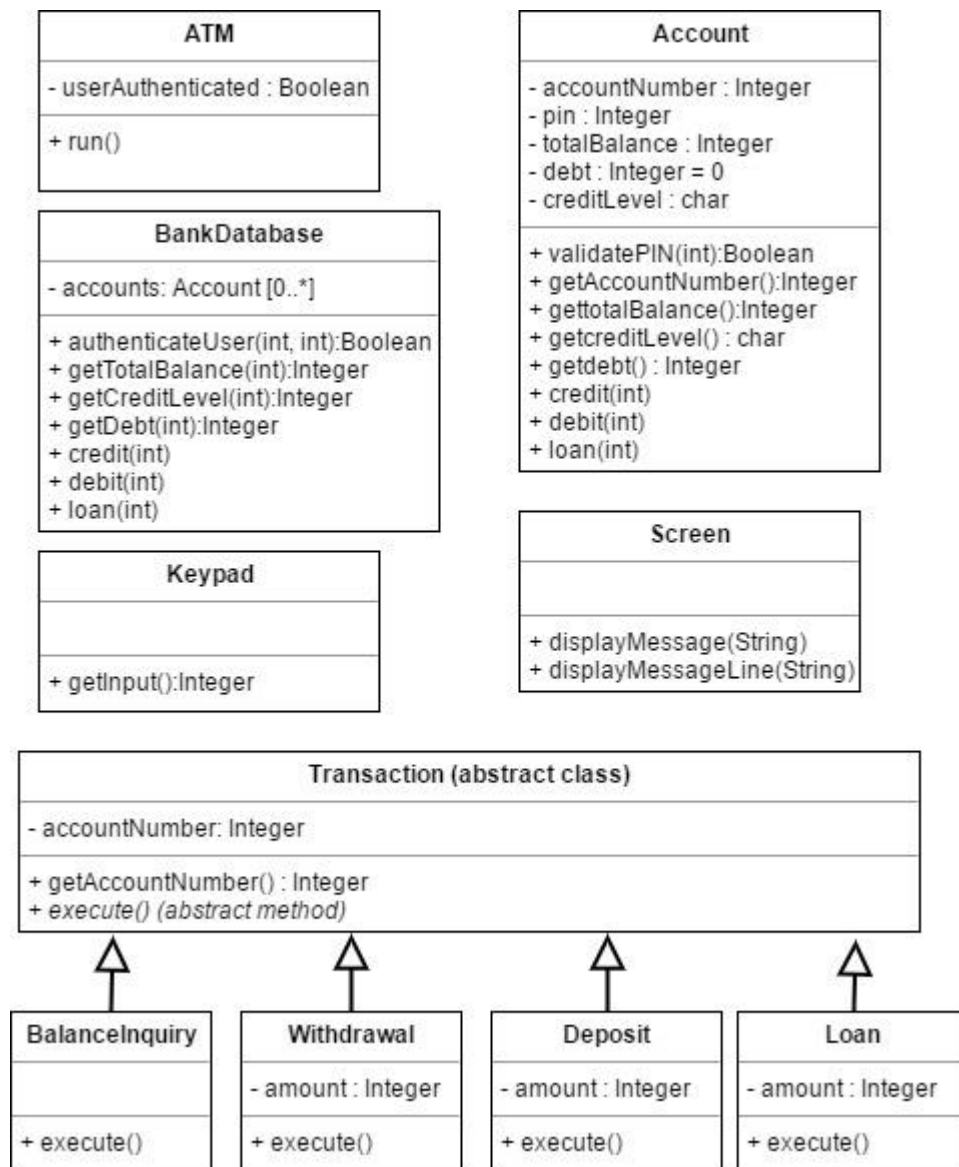

Reference: Class diagram (Wikipedia).

所有例外 情況都必須 處理， 程式 不得在使用者任意 輸入 的狀況下意外 結束， 否則將斟酌扣分。

## ● Introduction

根據作業提供的 UML 實作一個 ATM 系統，並練習使用 inheritance, polymorphism, abstract class 及 abstract method.

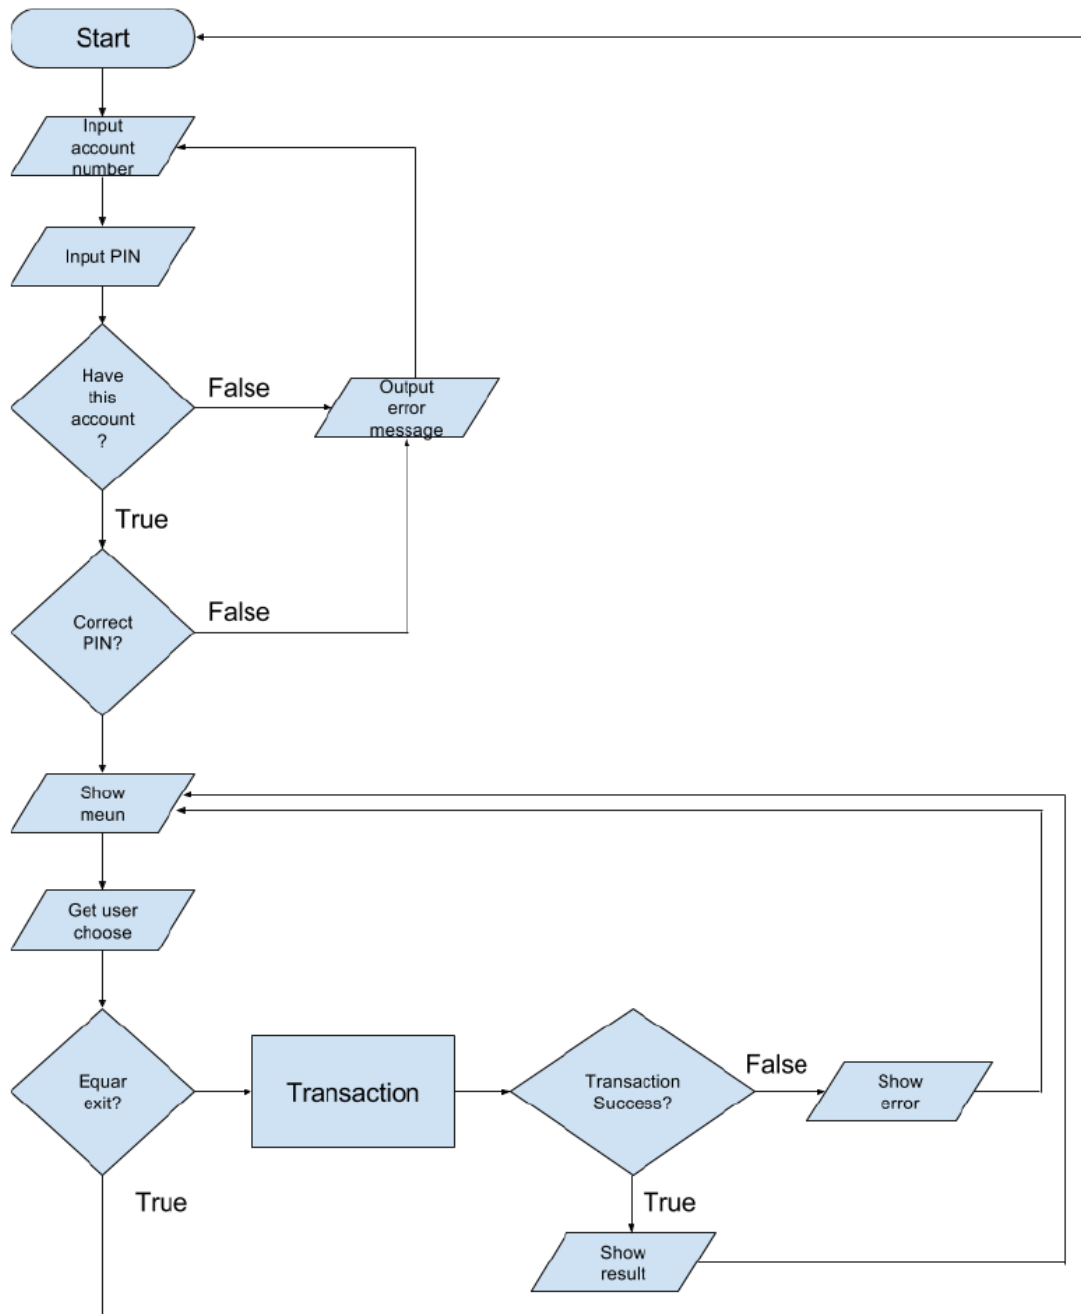

## ● UML

## ● Program Flow

ATM 中的 run 方法會使用無窮迴圈來重複歡迎者及認證，若成功認證，則使用者可以繼續進行交易完所需要的動作後選擇離開，ATM 會重設帳戶參數，再新開始上述流程，請使用無窮迴圈模擬 ATM，使用者可以離開系統但不會關閉 ATM。

程式流程圖如下：

程式中的交易主要分為兩個部份：

1. 帳戶儲蓄功能：包含取得帳戶餘額(getTotalBalance)、存錢(credit)及領錢(debit)等功能，模擬一般的帳戶儲蓄步驟。
2. 借貸功能：主要為借貸功能(loan)的模擬，並根據帳戶的信用等級給予不同的借貸額度，信用等級分為：
  - I. A：可借貸 12000 元
  - II. B：可借貸 9000 元
  - III. C：可借貸 7000 元

超過借貸金額則不予借貸，可重複借貸直到借貸上限為止，不與帳戶儲蓄功能有互動。

## ● Hint

提供 11 個參考檔案，可直接複製使用每類別中，除了 UML 所示的屬性之外，可自行添加所需的變數或函式。

帳戶需自建，建議使用參考檔案 BankDatabase.java 中預設帳戶，以方便日後 DEMO 進行。

## ● Sample Output

登入及儲蓄功能部份：

```
Welcome !
Please enter your account number:123
Please enter your pin:321

Main_menu:
1. View my balance
